Forecast for Monday 05 Apr 2021

Weather: Cloudy with a band of sleet and snow moving south during the early hours, followed by increasing amounts of sunshine. Feeling very cold in the wind. Some patchy cloud will develop into the afternoon, with a chance of a few short-lived snow showers late afternoon / early evening. Skies clearing during the evening and strong winds slowly easing.

Chance of cloud free mountain/hill tops above 600m: Generally 100%, but briefly 20% in sleet or snow early and 80% in any late afternoon snow showers.

Visibility: Excellent visibility at all levels for much of the day. Extensive cloud bases down to 500-600m on north-facing slopes in overnight rain, sleet and snow. Sudden deteriorations in any late afternoon snow showers with cloud bases temporarily lowering to 500-600m.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Unseasonably cold for April, exacerbated by the strength of the wind. Maximum wind gusts over summits likely to be 5-10mph stronger than indicated in the table above. UV levels strong too so sun protection advised.

Recent rainfall: measured at Cat & Fiddle: altitude 511m
